# END TO END MANUFACTURING SOLUTIONS WITH AGILITY AND SCALABILITY

PLASTIC/  
METAL  
INJECTION  
MOLDING

High volume manufacturing of plastic components suitable for identical products with tight tolerances. Manufacture high volume, intricate metal parts with ease using our Metal injection moulding services.

CNC  
MACHINING

High quality, tight tolerance machined components with high scalability for diverse applications across various industries.

PROTOTYPING  
SERVICES

One-off Rapid prototypes or direct low volume production runs from CAD data with lead times as low as 24 hours.

CASTING

One-stop partner for all your Casting requirements including Die Casting, Investment Casting, and Sand Casting.

FABRICATION

Complete fabrication solutions with excellent laser cutting, water jetting, sheet metal bending, punching & welding capabilities.

STAMPING

Realize your prototyping and mass production stamping requirements with Custiv hassle-free.

# 70%

## FASTER MANUFACTURING

#1 PLATFORM TO  
OPTIMIZE YOUR  
SUPPLY CHAIN,  
REDUCE  
PRODUCTION  
COSTS AND TIME-  
TO-MARKET

### UPLOAD PART AND SUBMIT YOUR REQUIREMENT

### GET THE MOST ECONOMICAL QUOTE QUICKLY

### INITIATE & MANAGE PROJECTS WITHOUT HASSLS

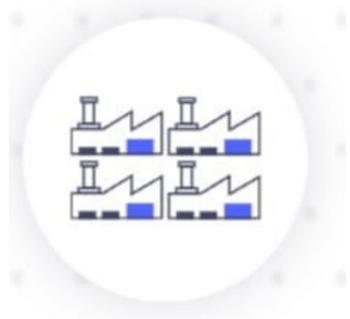

### TRACK EVERYTHING UNTIL DELIVERY

# Automotive Component Manufacturing

## Solutions

### **Production & Supply Chain**

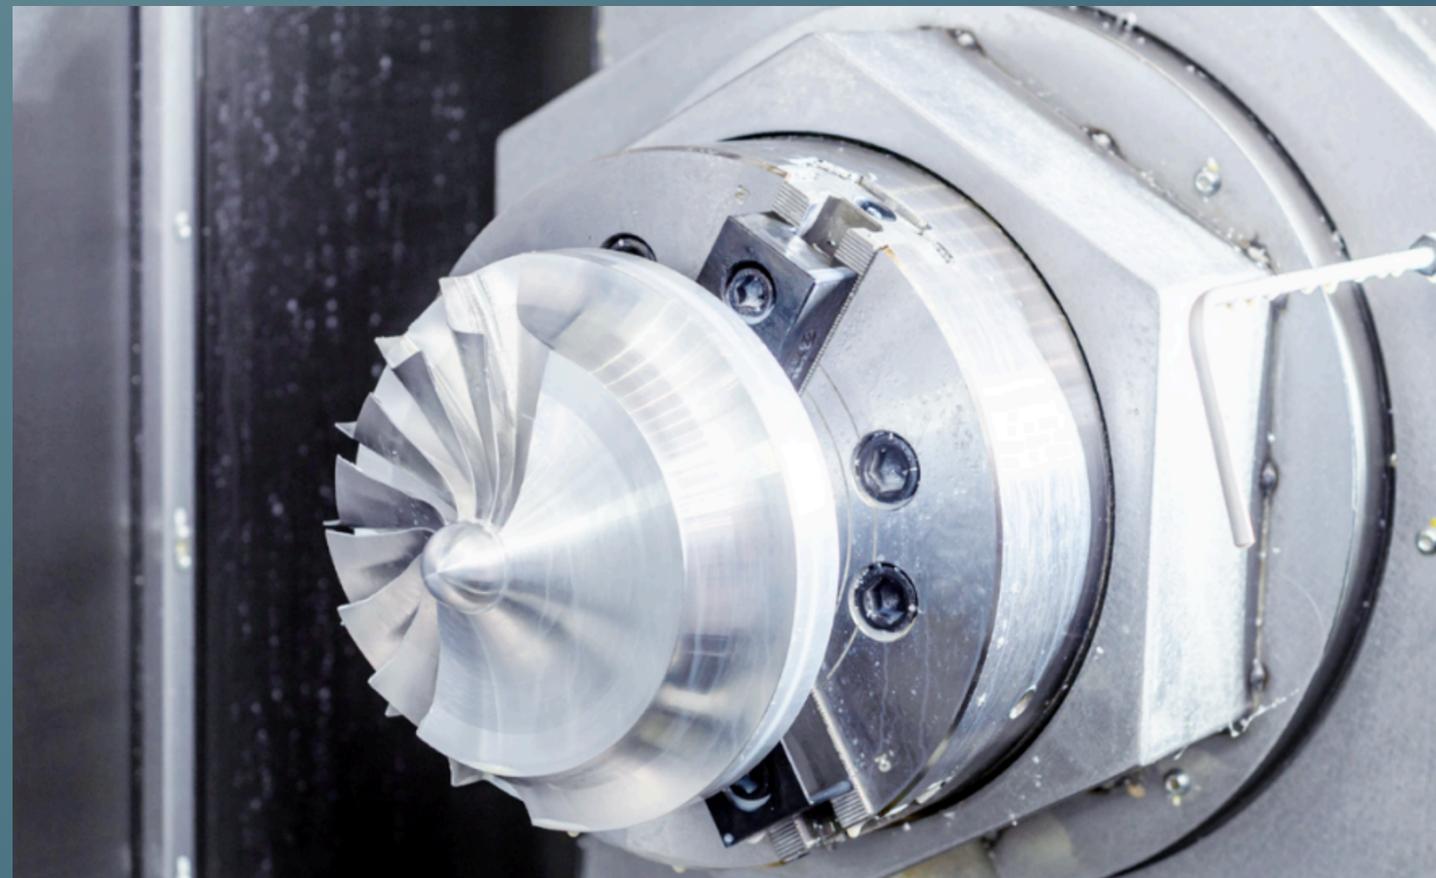

On-Demand & custom manufactured automotive components at highest quality, efficient cost & shortest lead times. Automotive sector demands scalability, efficiency and flexibility in the supply chain to keep a specific company as lean as possible. And we at G7, can help you achieve a dynamic, scalable and, more importantly, Automotive sector demands scalability, efficiency and flexibility in the supply chain to keep a specific company as lean as possible. And we at G7, can help you achieve a dynamic, scalable and, more importantly, on-demand manufacturing supply chain. Our business model permits us to manufacture to the exact demand; we can scale down and scale up. We a worked with several automotive manufacturers and achieved reduced lead time and simplified their supply chain.

# Aerospace & Defense Component Manufacturing Services

## Production & Supply Chain

On-Demand & custom manufactured aerospace components at highest quality, efficient cost & shortest lead times. The Aerospace and defense sector demands scalability, efficiency and flexibility in the supply chain to keep you as lean as possible. And we at G7 can help you achieve a dynamic, scalable, and more importantly, on-demand manufacturing supply chain. Our business model permits us to manufacture to the exact demand; we can scale-down and scale-up. Our partners, being AS9100D certified, can produce your production parts with the highest quality of manufacturing control.

# Healthcare and medical equipment industry

## **Production & Supply Chain**

On-Demand & custom manufactured healthcare components at highest quality, efficient cost & shortest lead times.

Many medical requirements demand parts to be manufactured in a clean room manufacturing setup and we have multiple suppliers who can manufacture your medical parts to your demand in a clean room setup.

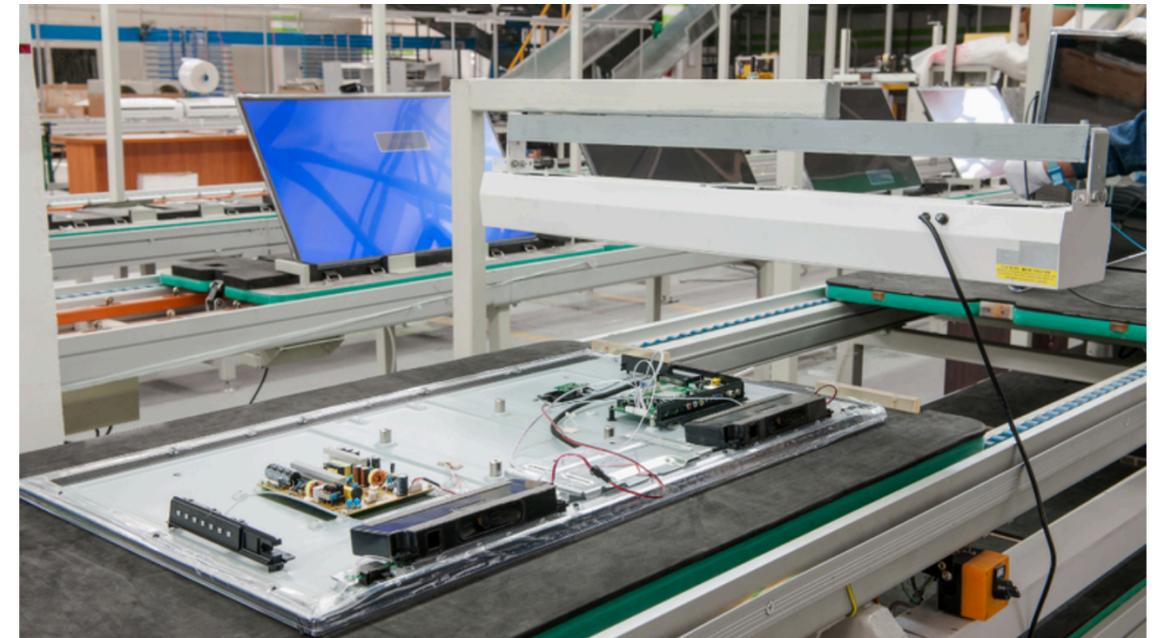

# Manufacturing solutions for Consumer durables industry.

## **Production & Supply Chain**

Complete manufacturing solution for your components including for ones requiring multiple manufacturing processes along with post processing & quality inspection. We at G7 , can help you achieve a dynamic, scalable, and more importantly, on-demand manufacturing supply chain. Our business model permits us to manufacture to the exact demand, we can scale down and scale up instantly upon demand. We have worked with several consumer product manufacturers, and achieved reduced lead time and simplified their supply chain.

# Industrial Component Manufacturing

## Production & Supply Chain

On-Demand & custom manufactured industrial parts components at highest quality, efficient cost & shortest lead times.

G7 can fulfil both your custom and standard parts manufacturing projects with the best possible costs and lead times. G7 fulfils your Industrial manufacturing projects with our 200+ pre-vetted, ISO certified manufacturers. Machinery components for agricultural, mining, Oil and Gas, Energy, Construction, Manufacturing & Metallurgy

# Telecommunication

## **Production & Supply Chain**

On-Demand & custom manufactured telecom components at highest quality, efficient cost & shortest lead times. Our distributed manufacturing business model allows us to manufacture your telecom parts at a practically unlimited scale. Our manufacturing partners, being ISO 9001:2015 certified, can produce your parts to the highest quality.

# Hardware Startups

## **Production & Supply Chain**

On-Demand & custom manufactured metal & plastic components at highest quality, efficient cost & shortest lead times.

G7 has over 200 rigorously vetted suppliers who are ISO certified to help you manufacture your components to the highest with the fastest lead times. We can make one off-prototype 3D printed or CNC machined parts, and we can also scale up to millions of parts. We use a distributed manufacturing supply chain that helps you to manufacture your parts without any supply chain hassles.

### **G7 For Prototyping**

G7 has worked with several Hardware start-ups on their prototyping projects and reduced their lead times and manufacturing costs. Our Digital manufacturing routing algorithm and our suppliers can help you to route your project and optimize it for the least possible lead times without any hassles for you, and help you innovate fast. We have specialized 3D printing and CNC machining facilities for fast prototyping. G7 has demonstrated excellence in helping start-ups reduce their concept to market time and can help you do the same.
